

AGIO ENDPOINT DETECTION & RESPONSE

powered by Cylance Optics

In today's world, your team is spread out between home, the office, and the road. That means more devices per person, and more devices to protect against evolving cyber-threats. The solution is robust endpoint protection. Agio Endpoint Detection & Response (EDR) combines the most sophisticated endpoint technology with our 24x7x365 SOC to hunt, investigate, and eradicate attacks before they damage your business. We go beyond no missed alerts and proactively recommend changes to keep your environment more secure. Always.

Powered by Cylance Optics, Agio EDR comes with the added benefit of forensic analysis and response mechanisms. Optics analyzes and correlates events as they occur on devices in near real-time. When Optics identifies certain artifacts of interest, it responds by displaying a notification or logging off the current user, providing an additional layer of threat detection and prevention.

Optics can be enabled on Windows, macOS, and Linux devices. The Optics agent deploys sensors into the operating system at various levels and subsystems to monitor and collect a diverse set of data. That data is then aggregated and stored in the Optics cloud database. Firms can use Optics data to detect, investigate, diagnose, and configure automated responses to device-based threats.

Taking it one step further, Agio can help clients create detection rule sets that are tailored to their desired configuration of rules and responses. Clients can also utilize Agio's recommended detection rules and create customized exceptions to exclude specific artifacts from detection.

There's no such thing as being too safe when it comes to protecting your users, devices and reputation from the world's most sophisticated threats. Incorporating an EDR solution that's supported by predictive intelligence and human brilliance increases the Extended Detection & Response (XDR) ability to detect, analyze and respond to threats in your environment.

EXAMPLE DETECTIONS ACROSS AGIO'S CLIENTS

Labels	Count of Threats Classification
Dual Use	58
Generic	16
Remote Access	9
Tool	33
Malware	20
Backdoor	1
Downloader	2
Fake AV	2
Generic	8
Infostealer	4

WHY AGIO?

#OneAgio

When you select Agio, you're investing in a relationship with everyone who's a part of this firm. Our teams operate in a symbiotic relationship, based on deposits and withdrawals, that creates a vehicle for delivering more than just service. We deliver an experience that reaffirms to our clients we've got them covered. From clean, concise implementations; to consistent support backed by automation and tools that work the way they're supposed to; to value-add reporting; to accurate, timely invoicing; and content on the latest IT and cybersecurity trends, we bring the full breadth and depth of our talent to bear. We deliver #OneAgio.
