AGIO MANAGED AZURE

Agio launches you into the future of IT with Agio Managed Azure public cloud computing. Using Microsoft Azure's award-winning public cloud, you will dramatically lower costs — compared to traditional infrastructure — with almost unlimited capacity, greater security, and state-of-the-art backup and disaster recovery. And, of course, moving to the public cloud with Agio is a smooth and secure transition. Our industry experts handle all migrations and management with 24x7x365 support. A migration you don't have to worry about — it's what you deserve from your IT partner.

Whether you keep just your backup or your entire environment hosted in the public cloud, Agio delivers a premium experience with Agio Managed Azure:

- Data Migration
- Agio Secure Email Hosting powered by Office 365
- Agio Server Hosting powered by Azure
- Agio Disaster Recovery powered by Azure

PAINLESS DATA MIGRATION

We'll seamlessly handle all the details in migrating your unique infrastructure—data, servers, networks, and the kitchen sink—to Microsoft Azure's public cloud. This includes implementing Azure's newest security features, testing and validating the migration. Once that's finished, we'll manage and secure your servers, monitor availability and performance, and resolve issues.

AGIO SECURE EMAIL HOSTING

powered by Office 365

The Microsoft products you know and love—Word, Excel, Outlook and more—are now based in the public cloud as Office 365. We combine these productivity tools with the latest enhancements like cloud collaboration, encryption technology, data classification and data leakage prevention tools—no matter where you are or what device you're using.

AGIO SERVER HOSTING

powered by Azure

Once Agio establishes your initial hardened cloud configuration, your infrastructure will have unlimited scale, allowing you to realize the flexibility and cost savings of the public cloud, almost immediately. Further, we regularly configure reviews of Azure best practices and security recommendations of existing and new features so you know you're taking advantage of all the cloud has to offer with the proper security in place.

AGIO DISASTER RECOVERY

powered by Azure

No matter the threat, Microsoft Azure is the perfect safety net. It's accessible from anywhere, has nearly unlimited capacity, and the pay-as-you-go pricing is cost effective. With a software-defined replication stack, Agio can replicate your infrastructure in or out of the cloud, expanding on the options for disaster recovery (DR). Behind the scenes, we configure, document, and maintain your recovery playbook, secure your public cloud, monitor and respond to RPO issues; run your DR testing; and initiate failover should a disaster occur, leveraging us to provide accelerated data restoration.

WHY AGIO?

#OneAgio

When you select Agio, you're investing in a relationship with everyone who's a part of this firm. Our teams operate in a symbiotic relationship, based on deposits and withdrawals, that creates a vehicle for delivering more than just service. We deliver an experience that reaffirms to our clients we've got them covered. From clean, concise implementations; to consistent support backed by automation and tools that work the way they're supposed to; to value-add reporting; to accurate, timely invoicing; and content on the latest IT and cybersecurity trends, we bring the full breadth and depth of our talent to bear. We deliver #OneAgio.
